

WHEELS AND SPROCKET FOR SCRAPER CONVEYORS

CHAIN SPROCKETS

- WE ALSO OFFER SPROCKETS FOR CONVEYOR CHAINS.
- WE MANUFACTURE POCKET WHEELS, TOOTHED WHEELS, AND SMOOTH WHEELS.
- THE WHEELS ARE MADE FROM ALLOY MATERIALS AND UNDERGO HEAT TREATMENT.
- WE SELECT HEAT TREATMENT BASED ON THE PARAMETERS OF THE SPECIFIC CONVEYOR CHAIN WITH WHICH THE WHEELS WILL BE USED. THIS ENSURES THE MAXIMUM LIFESPAN OF THE CHAIN ASSEMBLY.

DRIVE WHEELS

- IN ADDITION TO THE CLASSIC DESIGN, WE CAN OFFER WHEELS WITH INTERCHANGEABLE SEGMENTS.
- THIS DESIGN FACILITATES THE REPLACEMENT OF THOSE PARTS OF THE WHEELS THAT COME INTO CONTACT WITH THE CONVEYOR CHAIN.
- SEGMENTED DESIGN IS APPLICABLE FOR BOTH POCKET AND TOOTHED TYPES OF WHEELS. THERE IS ONLY A LIMITATION BASED ON THE MINIMUM DIMENSIONS OF THE WHEEL FOR A GIVEN CHAIN SIZE.
- THE PRODUCTION OF WHEELS IS CARRIED OUT ON A CUSTOM BASIS. WE COLLABORATE WITH THE CUSTOMER IN DESIGNING THE DESIRED WHEEL AND STRIVE TO INCORPORATE ALL TECHNICALLY FEASIBLE REQUIREMENTS.

DRIVEN WHEELS

- WE MOST COMMONLY MANUFACTURE DRIVEN/RETURN WHEELS IN A SOLID DESIGN WITH SINGLE-SIDED GUIDANCE.
- MATERIALS AND HEAT TREATMENT FOR THESE WHEELS ARE ALSO SELECTED BASED ON THE PARAMETERS OF THE CONVEYOR CHAIN USED.
- THE PRODUCTION OF WHEELS IS CARRIED OUT ON A CUSTOM BASIS. WE COLLABORATE WITH THE CUSTOMER IN THE DESIGN OF THE DESIRED WHEEL, STRIVING TO INCORPORATE ALL TECHNICALLY FEASIBLE REQUIREMENTS.
